ENVIRONMENTAL ASSESSMENT
For Routine Actions with Limited Environmental Impact

Part I. Proposed Action Description

1. Applicant/Contact name and address: Lee & Elizabeth Woolley
29 W 280 Hartman Dr
Naperville, IL 60564
2. Type of action: Application for Beneficial Water Use Permit # 43B-30066967
3. Water source name: Groundwater
4. Location affected by project: NESWNESE of Section 8, T09S, R08E, Park County.
5. Narrative summary of the proposed project, purpose, action to be taken, and benefits:

This application is to obtain a water right for a well located in the Yellowstone Controlled Groundwater Area (YCGA). Water is proposed to be diverted by means of a groundwater well from January 1 to December 31 annually at a rate of 15 gallons per minute (GPM) up to 1.0 acre-feet (AF) for domestic use, from a point in the NESWNESE of Section 8, T09S, R08E, Park County. The water from this well measured 48.0 degrees Fahrenheit (F). The National Park Service was notified. If they do not object, a permit will be issued.

6. Agencies consulted during preparation of the Environmental Assessment:
(include agencies with overlapping jurisdiction)

Montana Natural Resource Program.....Species of Concern
US Fish and Wildlife Service.....Wetlands Mapper
National Park Service.....Water Resources Division

Part II. Environmental Review**1. Environmental Impact Checklist:**

PHYSICAL ENVIRONMENT

WATER QUANTITY, QUALITY AND DISTRIBUTION

Water quantity - Assess whether the source of supply is identified as a chronically or periodically dewatered stream by DFWP. Assess whether the proposed use will worsen the already dewatered condition.

Determination: No impacts identified

The source is groundwater, tributary to the upper Yellowstone River, which is not on the DFWP list. No impact identified.

Water quality - Assess whether the stream is listed as water quality impaired or threatened by DEQ, and whether the proposed project will affect water quality.

Determination: No impacts identified

The source of water is groundwater, tributary to the upper Yellowstone River, which is not on the DEQ list. No impact identified.

Groundwater - Assess if the proposed project impacts ground water quality or supply. If this is a groundwater appropriation, assess if it could impact adjacent surface water flows.

Determination: No significant impacts identified

The well is unlikely to affect adjacent surface flows. The National Park Service has been contacted, per compact requirements. No significant impact identified.

DIVERSION WORKS - Assess whether the means of diversion, construction and operation of the appropriation works of the proposed project will impact any of the following: channel impacts, flow modifications, barriers, riparian areas, dams, well construction.

Determination: No impacts identified

The diversion is a 101 foot-deep well, drilled by a licensed contractor. No identified impact to existing resources.

UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES

Endangered and threatened species - Assess whether the proposed project will impact any threatened or endangered fish, wildlife, plants or aquatic species or any "species of special concern," or create a barrier to the migration or movement of fish or wildlife. For groundwater, assess whether the proposed project, including impacts on adjacent surface flows, would impact any threatened or endangered species or "species of special concern."

Determination: No impact identified

The Montana Natural Heritage Program identified species of concern. The Species of Concern Data Report identifies the Pinyon Jay, Clark's Nutcracker, Cassin's Finch, Yellowstone Cutthroat Trout, Grizzly Bear, Wolverine, Canada lynx, and Bison. No identified impact to the endangered and threatened species.

Wetlands - Consult and assess whether the apparent wetland is a functional wetland (according to COE definitions), and whether the wetland resource would be impacted.

Determination: No impacts identified

No wetlands exist in the project area.

Ponds - *For ponds, consult and assess whether existing wildlife, waterfowl, or fisheries resources would be impacted.*

Determination: Not applicable

This project does not include a pond.

GEOLOGY/SOIL QUALITY, STABILITY AND MOISTURE - *Assess whether there will be degradation of soil quality, alteration of soil stability, or moisture content. Assess whether the soils are heavy in salts that could cause saline seep.*

Determination: No impacts identified

There is no saline seep in this area, and no soil degradation will occur.

VEGETATION COVER, QUANTITY AND QUALITY/NOXIOUS WEEDS - *Assess impacts to existing vegetative cover. Assess whether the proposed project would result in the establishment or spread of noxious weeds.*

Determination: No significant impacts identified

The disturbed areas have reclaimed themselves since construction. No significant impact identified.

AIR QUALITY - *Assess whether there will be a deterioration of air quality or adverse effects on vegetation due to increased air pollutants.*

Determination: No impacts identified

There should be no impact to air quality from this development. No impact identified.

HISTORICAL AND ARCHEOLOGICAL SITES - *Assess whether there will be degradation of unique archeological or historical sites in the vicinity of the proposed project if it is on State or Federal Lands. If it is not on State or Federal Lands simply state NA-project not located on State or Federal Lands.*

Determination: NA-project not located on State or Federal Lands.

DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AND ENERGY - *Assess any other impacts on environmental resources of land, water and energy not already addressed.*

Determination: No impacts identified

No anticipated additional impacts

HUMAN ENVIRONMENT

LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS - *Assess whether the proposed project is inconsistent with any locally adopted environmental plans and goals.*

Determination: No impact identified

The proposed project is not inconsistent with locally adopted environmental plans and goals.

ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES - *Assess whether the proposed project will impact access to or the quality of recreational and wilderness activities.*

Determination: No impacts identified

This well is drilled on private property.

HUMAN HEALTH - *Assess whether the proposed project impacts on human health.*

Determination: No impacts identified.

PRIVATE PROPERTY - *Assess whether there are any government regulatory impacts on private property rights.*

Yes___ No_**x**___ *If yes, analyze any alternatives considered that could reduce, minimize, or eliminate the regulation of private property rights.*

Determination: No impacts identified.

OTHER HUMAN ENVIRONMENTAL ISSUES - *For routine actions of limited environmental impact, the following may be addressed in a checklist fashion.*

Impacts on:

- | | |
|---|-----------------------------------|
| (a) <u>Cultural uniqueness and diversity?</u> | No impacts identified |
| (b) <u>Local and state tax base and tax revenues?</u> | No significant impacts identified |
| (c) <u>Existing land uses?</u> | No significant impacts identified |
| (d) <u>Quantity and distribution of employment?</u> | No impacts identified |
| (e) <u>Distribution and density of population and housing?</u> | No significant impacts identified |
| (f) <u>Demands for government services?</u> | No significant impacts identified |
| (g) <u>Industrial and commercial activity?</u> | No impacts identified |
| (h) <u>Utilities?</u> | No significant impacts identified |
| (i) <u>Transportation?</u> | No significant impacts identified |
| (j) <u>Safety?</u> | No impacts identified |
| (k) <u>Other appropriate social and economic circumstances?</u> | No impacts identified |

2. *Secondary and cumulative impacts on the physical environment and human population:*

Secondary Impacts No secondary impacts have been identified

Cumulative Impacts No cumulative impacts have been identified

3. ***Describe any mitigation/stipulation measures:*** Mitigation or stipulations are not planned at this time.
4. ***Description and analysis of reasonable alternatives to the proposed action, including the no action alternative, if an alternative is reasonably available and prudent to consider:*** The no action alternative is the only alternative to the proposed action. Under the no action alternative, the applicant would be unable to obtain a water right for the proposed domestic and lawn and garden use.

PART III. Conclusion

1. ***Preferred Alternative:*** Obtain a water right for the proposed purpose.
2. ***Comments and Responses:*** None at this time.
3. ***Finding:***
Yes___ No_x__ Based on the significance criteria evaluated in this EA, is an EIS required?

If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action:

None of the identified impacts for any of the alternatives is significant as defined in ARM 36.2.524

Name of person(s) responsible for preparation of EA:

Name: Porter Dassenko
Title: Water Resource Specialist
Date: 1/14/2018
